

1. <https://www.youtube.com/watch?v=toJe8ZbFhEc>

- This will show you how to install tensorflow using CUDNN
- I also installed Jupyter Notebook using the conda environment I created

2. You will also need to install tensorflow-io this website will show which tensorflow-io version is compatible with your tensorflow version

3. Resources I used to build model

- [https://www.tensorflow.org/api\\_docs/python/tf](https://www.tensorflow.org/api_docs/python/tf)
